

LAKE COUNTY TECHNOLOGY CAMPUS

Philosophy Statement

The Lake County Technology Campus serves as an extension of the Libertyville High School curriculum. Juniors and seniors from high schools in Lake and McHenry Counties take the career-oriented courses that are offered at the Technology Campus. The curriculum is designed to meet current job market needs and is revised annually to keep training skills up-to-date.

Students who successfully complete a Technology Campus Program will receive one and one half (1.5) credits per semester.

Students interested in LCTC courses must fill out an application. The student's Learning Support Team screens applicants. All students must sign up for an all day schedule (no early day or late day will be permitted).

Many Technology Campus programs require students to purchase uniforms, safety glasses, tools of the trade, or other consumable items. Fees are approximate and vary according to each student's program and are subject to change. The fees are charged to the student through the Technology Campus.

Students interested in learning more about the Technology Campus and program offerings can find additional information by visiting our web site at <http://www.techcampus.org>. Copies of the current Technology Campus Program Catalog can be found in your counselor's office.
